Introduction

The CoCicd11-B credential demonstrates a practitioner's tested skills in data quality and accuracy as well as mastery of coding proficiency.

The CoCicd11-B certification is a natural progression for professionals experienced in coding inpatient and outpatient records.

Assessments determine whether you have the required skills and knowledge to be a competent clinical coder. It is essential that assessments represent your own work.

Assessments are based on written practical application of the material studied and do not include essay-type questions.

*Certification of
Coder*

ICD-II Coding (Basic Level)

5-6 March 2024

Organised by

**INTERNATIONAL CENTRE FOR CASEMIX AND
CLINICAL CODING (ITCC), HCTM**
www.hctm.ukm.my/ITCC

Pre-requisite skills, knowledge, experience and attendance criteria

The CoCICD11-B pre-requisite criteria ensure that an applicant has the base skills and knowledge required to become a clinical coder.

- Have been employed as a clinical coder for between 1-6 months. Ideally, the trainee clinical coder will have been working within the department for a minimum of 6 weeks before attending the course
- Have completed or experience with the following course or knowledge:
 - Course on Introduction to ICD-11
 - Basic Anatomy, Physiology and Medical Terminology
 - Basic Introduction to Clinical Coding
